

WRI's Adverse Weather/Tropical Monitoring services provide your vessels and operations team with continuous surveillance of all potential weather-related hazards, both at sea and in port. Our services are designed to provide safe and efficient transits, with valuable tools and summaries for the land-based staff. Vessels are provided with daily maps, port forecasts, summaries, and forecast/routing advice to minimize or avoid any threat. **Dolphin OnLine** and **Dolphin OnBoard** are included with this service. **Fleet Monitoring Dashboard** is also included for land-based operations, which allows for continuous monitoring of the latest weather conditions for the fleet.

- Adverse Weather Summaries
- Tropical Summaries
- Dolphin Maps/Charts
- Dolphin OnLine / Dolphin OnBoard**
- Dolphin Fleet Monitoring Dashboard
- Dolphin Tropical Tracker
- Visibility and Tender Reports
- Daily Forecast Maps and Port Forecasts
- Optimum Route/Weather Advisories
- Earthquake/Tsunami Alerts
- Sea Ice/Icebergs
- Severe Squalls
